My Dear Mr. Randall.

Do you think there is hope for the young lady. Prof Thompson of Jefferson College has advised her to stop for a time, - I do not know whether she follows his advice or not, because she has her living to make, - and says that if her eyes show no improvement, she will have to undergo the atropia treatment. The difficulty in the way - as he puts it, - is in the strain of looking at the lines on the scales. It would be a godsend if she could have the change asked for without jeopardizing her relations with her superiors, or of creating the feeling that she complains without a cause.

Yours E. J. Warburton
